

ADELAIDE CIVIL STRUCTURES

CAPABILITY STATEMENT

WHO ARE WE

ABOUT US

Adelaide Civil Structures is a merge of two leading civil construction companies; Derry Form Pty Ltd & Del-Con Services, who have combined their capabilities and resources to expand and deliver exceptional results every time. The companies have a proven track record in the civil space with a combined 40 years in the construction industry.

Our expertise is in all aspects of concrete reinforcement work, including form work, steel fixing and concrete. Our team consists of highly skilled concreters, form workers and steel fixers which is continuously expanding as the company continues to grow.

KEY ATTRIBUTES

- Highly skilled workforce with certifications in relevant safety and construction standards.
- Use of advanced technology and techniques to enhance efficiency and quality.
- Strong commitment to safety, sustainability, and environmental responsibility.
- Proven track record of collaboration with architects, engineers, and other contractors to deliver integrated solutions

CURRENT PROJECTS

Rocktown Works

FRP Works are currently ongoing for multiple projects for Rocktown including work in precast yards forming and pouring barriers

ProjectExperts + Genus

FRP Works are currently ongoing for a substation in Reeves Plains which includes multiple forms of concrete works pouring slabs and footings

Blubuilt + MDJV

FRP Works are currently ongoing for a PRV slab which includes a 2 height slab with in-situ walls being poured. Works are being completed on an MDJV and SA Water site.

Green Grid Connect - Blind Creek Substation

ACS is engaged to deliver the entire civil and formwork, reinforcement and concrete (FRP) scope for the Blind Creek Substation project in Canberra. The scope includes excavation for slabs, conduits and earthing, together with piling and FRP works. Delivery involves coordinating multiple work packages using our own crews and engineers to manage site activities, sequencing and quality requirements.

COMPLETED PROJECTS

We have been involved in a number of exciting projects across multiple States, ranging from high rise to civil construction, including bridge work.

March 2026 – July 2026

Performing FRP Works for SRG and SA Water to create a new pump station in Concordia
